HIGH TECHNOLOGY BEAUTY TREATMENTS

○ SONOPHORESIS/Sonoderm

Lipolytic action. A treatment through the waves of low frequency active cellular metabolism, stimulates and acts on fibroblasts, reducing cellulite and dissolving the layer of subcutaneous fat in the abdomen, hips and buttocks.

○ MUSCLE TONING

Firming and toning action. Deep muscle toning, remodeling. Lymphatic and venous drainage, treatment of cellulite and swelling.

○ ELECTROPORATION-MESOAESTHETIC

Anti-fat, anti-aging. Mesotherapy without needles, allows the penetration of low molecular weight substances through the skin in a non-invasive, quick and painless way. For the body: depending on the protocol chosen: treatment of cellulite, localized adiposity, treatment effect tensor.

For the face: anti-aging, firming, smoothing.

○ BIPOLAR RADIO FREQUENCY

Firming action. A new method to treat sagging skin, cellulite, localized adiposity and stretch marks. It is non-invasive, painless, fast and efficient. Reduces the volume of fat cells, stimulates collagen and fibroblasts. The treatment is repeated 2-3 times per area at a distance of at least 24 hours of each other.

○ PHOTOMODULATION LED

Anti-aging anti-redness action. Treatment that promotes the production of collagen and blocks the negative effects of collagenases (enzyme that blocks the production of collagen). Ideal to prepare the skin for sun exposure and to repair the damaging effects caused by the sun.

○ POWERSHAPE

Anti- cellulite, lipolytic action. Combines the technologies of radio, lipo-laser, vacuum pressure and their effect on fat and dermis to eliminate fat, improve body metabolism, tone the skin, blood circulation and also helps to reshape and smooth the body. The treatment is repeated 2-3 times per area at a distance of at least 24 hours of each other. (Be made on areas lack of hair.)

○ JET PEEL

Brightness effect, peeling. A system for skin rejuvenation, superficial peeling, lymphatic drainage, detoxification, treatment of skin with dilated pores, increased repair processes (pre / post treatment laser or pulsed light), with regeneration complex vitamins, hyaluronic acid.

○ iPiCO

Effect of unification of complexion with rejuvenation of the face. Using a variety of tools, such as micro-current, current nano and pico-amperes to obtain the effect of brightness, stimulation of collagen, hydration and lightening of the pigmented spots on tanned skin.

○ SKIN ANALYSIS

Diagnosis of skin with polarized light.

Duration 15 minutes.

LASER

○ FRAXEL LASER

Anti-Age action. Is a treatment that is the next generation of minimally invasive treatments available to specialists for the rejuvenation of the skin, stimulating collagen production, for the treatment of melasma and hyper pigmentation and acne and scarring of the results. Can be done on the décolleté, hands and other body parts. (After medical examination)

○ LASER ULTHERA

Anti-Age action, lifting effect. Uses ultrasound technology to counter the effects of time and aging skin firming soft tissue depth. Qualifies as a non-surgical minilifting. After the first treatment you will already perceive significant elevations of the eyebrows, the feeling of rejuvenation of the skin in the face and neck become more toned and relaxed. (After medical examination)

○ LASER DIODE

Elimination of small defects of the skin. (After medical examination)

○ INTENSE PULSED LIGHT

Anti-Age action. A beauty treatment by immediate result based element of light energy that allows you to treat the affected area without damaging the surrounding tissue.

- Photo rejuvenation (wrinkles on the face and neck)
- Treatment of pigmentation on the face, chest and arms*
- Acne treatment
- Vascular lesion treatment (spider veins, couperose)
- Permanent hair removal (requires several sessions)

(*Treatment of pigmentation: the lesion darkens and crusts after the treatment and is naturally sloughed off the skin within two weeks.)

○ LIPOSONIX

Non-Surgical Liposuction. LipoSonix technology works by applying high intensity ultrasound energy through the skin in specific areas, where there is subcutaneous fat. The ultrasonic energy breaks up the fat cells permanently without damaging the epidermis, the dermis, the underlying tissue or organs. The treatment gives immediate results. A possible reduction of the circumference of 3-4 cm. (After medical examination)

○ OXYGEN

Brightness Effect. A revitalizing treatment with different substances, depending on skin type.

Painless, non-marking and has no contraindications. Depending on the complex used may achieve the effect of improving skin texture, visibly smooth fine lines and wrinkles, uneven pigmentation, uniformity, skin smooth, revitalized and radiant.
